

Indane Gas

Indane Gas information:-Indane is today one of the largest packed-LPG brands in the world.

Indian Oil pioneered the launch of LPG in India in the 1970s and transformed the lives of millions of people with the introduction of the clean, efficient and safe cooking. LPG also led to a substantial improvement in the health of women in rural areas by replacing smoky and unhealthy chullahs with Indane. It is today a fuel synonymous with safety, reliability and convenience. [indane gas](#) Suraksha LPG hose, flame retardant aprons and energy efficient Green Label stoves are recommended to enhance safety measures while using LPG as fuel.

LPG is a blend of Butane and Propane readily liquefied under moderate pressure. LPG vapour is heavier than air; thus it normally settles down in low-lying places. Since LPG has only a faint scent, a mercaptan odorant is added to help in its detection. In the event of an LPG leak, the vapourisation of liquid cools the atmosphere and condenses the water vapour contained in it to form a whitish fog, which is easy to observe. LPG in fairly large concentrations displaces oxygen leading to a nauseous or suffocating feeling.

Every second LPG cooking gas connection in India is an Indane. The world's highest LPG bottling plant – situated 3500 metres above sea level – is at Leh. Each day, the Indane Gas distribution network delivers 1.20 million cylinders. Of the 57.41 million families served by 5500 Indane distributors, 27% are in semi-urban and rural markets.

The regulator valve of the LPG cylinder must always be kept closed, except at the time of cooking, particularly at night times the house holder should ensure closing it before going to bed.

LPG Cylinder must be kept in upright position, no inflammable material kept close to it, and never to keep in the kitchen not more than one cylinder

Periodic check of gas leak must be done, with the help of soap solution, which would show up with bubbles if there were leaks and never check the stove when it is in flame.

Only [indane gas connection](#) distributor supplied regulators and hoses with ISI marks must be used, as most of the accidents have happened because of gas leakage through hoses.

It must be ensured that all the parts of installation are in good condition and if there be any doubt the distributor should be approached for help.

Never ever the LPG Cylinder should be tampered Toll Free Numbers of Indane Gas Help desk and customer care : **18002333555 or 155233**
